

PlusCare™

A Rescue Ready® Service

Ensure AED readiness as part of your system of care with PlusCare™ maintenance programs. You'll have peace of mind knowing that your devices will be ready for the rescue when you turn to the experienced PlusCare team for annual maintenance, device troubleshooting and even consumable replacements.

The solution is simple: the benefit is clear. Let our team do the heavy lifting with on-site certified technicians so your pads and batteries will always be up to date. You'll even have full support in the event of a device use.

PlusTrac® AED Program Management

Every PlusCare license includes PlusTrac program management to track the readiness of your devices—and your responders. This powerful software includes a PlusTrac AED prescription, access to the state-by-state AED legislation library, compliance notifications, and customer support.

Annual Maintenance

On-site inspections, site assessments, and accessory replacements* provide peace of mind that your equipment will be ready when it's needed. PlusCare offers reliable AED service and maintenance performed by trusted expert technicians.

Manufacturer Recall Alerts

It can take months for AED recall notices to reach those who can take action. Based on the make and model of your AED, the PlusCare team will help you address these important notifications in a more timely fashion so you can ensure that your equipment is always Rescue Ready.

Post-Event Support

We hope you never have to use your AED, but if you do, we know SCA events are traumatic. They can cause strong emotions in everyone involved. PlusCare post-event support takes care of your AED equipment and report important event-related data so you can focus on what matters most—the people involved in the SCA event.

*PlusCare Preferred includes annual maintenance. PlusCare Advanced includes annual maintenance and consumable replacements.
