

ZOLL End-Tidal CO₂

Proven, Reliable Capnography

The Only Defibrillator Monitor Pacemaker with
"Plug-and-Play" Mainstream and Sidestream End-Tidal CO₂

ZOLL
Advancing Resuscitation. Today.™

ZOLL EtCO₂

- Superior technology provides continuous CO₂ monitoring and diagnostic information
- Users can switch easily between Mainstream and Sidestream options
- Rapid warm-up provides accurate and timely information
- The flexibility to choose the appropriate technology for your clinical needs

**ZOLL is the name
you can rely on
for high performance,
proven efficacy,
and ease of use.**

The Most Choices for EtCO₂ Monitoring

ZOLL® M Series® and E Series® defibrillators equipped with Respironics® End-Tidal CO₂ technology are built for ease-of-use and maximum durability in the prehospital setting. With ZOLL Plug and Play CO₂ solutions, performance can be optimized on intubated patients with the CAPNOSTAT® Mainstream Sensor or for non-intubated applications or short-term monitoring of intubated patients with the LoFlo™ Sidestream CO₂ Module.

Sidestream Technology

- 50 ml/min sampling rate provides consistent and reliable CO₂ monitoring across all clinical applications
- Unique sample cell eliminates the potential for contamination that typically occurs with other sidestream systems

Mainstream Technology

- Small, lightweight sensor provides fast response and reliable monitoring for all patients
- Easy-to-use airway adapters provide hassle-free uninterrupted monitoring

Constant EtCO₂ digital readout during monitoring, pacing, and defibrillation plus CO₂ waveform.

Solid state CAPNOSTAT Mainstream Sensors and Sidestream Modules

ZOLL End-Tidal CO₂ Specifications

For complete specifications, please consult your M Series/E Series Operator Manual.

Transducer Type: CAPNOSTAT 3® Mainstream, LoFlo™ Sidestream; CAPNOSTAT 5®: Mainstream, LoFlo Sidestream.

Principle of Operation: Non-Dispersive Infrared (NDIR) single beam optics, dual wavelength, no moving parts.

Warm-up Time: Full specifications within 2 minutes at an ambient temperature of 25°C. Capnogram in 15 seconds.

Environmental: Operating Temperature: 10°C to 40°C, Storage and Shipping Temperature: -10°C to 55°C (CAPNO 3); 0°C to 45°C (0°C to 40°C for LoFlo Module); Storage and Shipping Temperature: -40°C to 70°C (CAPNO 5). Units may not perform to specifications when stored at the upper or lower extreme limits of storage temperature and immediately put into use.

Specifications subject to change without notice.
